Warning

CAUTION

- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

The refrigerant isobutene(R600a) is contained within the refrigerant circuit of the appliance, a natural gas with a high level of environmental compatibility, with which is nevertheless flammable.

During transportation and installation of the appliance, ensure that none of the components of the refrigerant circuit becomes damaged

The refrigerant (R600a) is flammable.

Symbol ISO 7010 W021 Warning;
Risk of fire/flammable materials!

Warning

1. **WARNING:** The appliance must be positioned so that the plug is accessible.
2. **WARNING:** If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
3. **WARNING:** Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.
4. **WARNING:** Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.
5. **WARNING:** Do not damage the refrigerant circuit.
6. **WARNING:** Do not use electrical appliances inside the food storage compartments of the appliance, unless they are of the type recommended by the manufacturer.
7. **WARNING:** This unit uses R600a as the refrigerant and cyclopentane as the foaming agent, both of these materials are easily burnt, when discarding the unit it should be kept away from sources of extreme heat.
8. **WARNING:** Danger of electrical shock, the unit is used yellow-green grounding wire of this appliance must be grounded before operation.
9. **WARNING:** When the refrigerator is discarded after use please follow all local laws and regulations.
10. **WARNING:** The refrigerant and insulation blowing gas are flammable. Disposing of the refrigerant can only be done at authorized waste disposal centers. Do not expose the refrigerant or insulation to extreme heat or an open flame.

Warning

11. **WARNING:** Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.
12. **WARNING:** When positioning the appliance, ensure the supply cord is not trapped or damaged.
13. **WARNING:** Do not locate multiple portable socket-outlets or portable power supplies at the rear of the appliance.
14. **WARNING:** To avoid contamination of food, please respect the following instructions:
 - Opening the door for long periods can cause a significant increase of the temperature in the compartments of the appliance.
 - Clean regularly surfaces that can come in contact with food and accessible drainage systems.
(special for water dispenser products):
 - Clean water tanks if they have not been used for 48h; flush the water system connected to a water supply if water has not been drawn for 5 days.
 - Store raw meat and fish in suitable containers in the refrigerator, so that it is not in contact with or drip onto other food.
 - Two-star frozen-food compartments are suitable for storing pre-frozen food, storing or making ice-cream and making ice cubes.
 - One-, two- and three-star compartments are not suitable for the freezing of fresh food.
 - If the refrigerating appliance is left empty for long periods, switch off, defrost, clean, dry, and leave the door open to prevent mould developing within the appliance.

Warning

15. **WARNING:** Risk of child entrapment.
Before you throw away your old refrigerator or freezer:
- Take off the doors.
 - Leave the shelves in place so that children may not easily climb inside.
16. **WARNING:** Before performing any type of installation or cleaning, disconnect the refrigerator from the power source and reset the temperature controls to the desired setting(s).
When you are finished, reconnect the refrigerator to the electrical source and reset the temperature controls to the desired setting.
17. **WARNING:** This appliance is intended to be used in household and similar applications such as:
- staff kitchen areas in shops, offices and other working environments;
 - farm houses and by clients in hotels, motels and other residential type environments;
 - bed and breakfast type environments;
 - catering and similar non-retail applications.
18. **WARNING:** The new hose-sets supplied with the appliance are to be used. Any **old hose-sets should not be re-used.**
19. **WARNING: Connect to potable water supply only.**
The water supply system must be installed and connected by a professional technician.
Connect the refrigerator with the cold water pipe :
Min. pressure: 140000 pascals;
Max. pressure: 690000 pascals;

Warning

This symbol on the product or in its packing indicates that this product may not be treated as household waste. Instead, it should be taken to the appropriate waste collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by the inappropriate waste handling of this product. For more detailed information about the recycling of this product, please contact your local council, your household waste disposal service, or the shop where you purchased the product.

Safety and Warning Information

Basic safety symbol

This guide contains many important safety messages. Always read and obey all safety messages.

This is the safety alert symbol. It alerts you to warnings that will inform you of any potential hazards that could hurt or kill you. These messages will also help protect your unit from damage. All safety messages will be preceded by the safety alert symbol and the hazard signal word DANGER, WARNING, or CAUTION. These words mean:

You could be killed or seriously injured if you don't follow the instructions.

You may be killed or seriously injured if you don't follow the instructions.

Indicates an imminently hazardous situation which if not avoided, may result in minor or moderate injury or product damage only.

Appliance connection

This product is applicable to 115V/60Hz only, and the allowable voltage fluctuation range is 98V~132V. It can not be used if the voltage frequency is not 60Hz.

In order to ensure safety, the socket and its cable must be able to withstand the current of above 15A.

LED light

Replaceable (LED only) light source by a professional.

Safety and warning information

To reduce the risk of fire, electric shock, or injury to persons when using your product, basic safety precautions should be followed, including the following.

Read all instructions before using this appliance.

Safety and Warning Information

Safety and warning information

If you believe there is refrigerant leaking, do not touch the unit or the power outlet, ventilate the room and if possible turn your unit off using the circuit breaker. Call the manufacturer immediately.

Refrigerant will cause serious injury when coming into contact with the skin or eyes. If this happens please immediately seek out medical treatment.

Make sure to use a grounded power outlet. Consult a qualified electrician or service person if the ground-ing instructions are not completely understood, or if you have doubts on whether the appliance is properly grounded.

Wait for 5 minutes or longer before reconnecting the power cord. Failure to do so may cause the freezer to fail.

The incorrect grounding may cause breakdown and/or electric shock.

A dedicated outlet should be used. Using several devices at one outlet may cause fire.

Do not allow the power plug to face upward or to be squeezed at the back of the fridge. Water may be flown into or the plug may be damaged, which can cause fire or injury.

Do not allow the power cord bent or pressed by the heavy object to be damaged.

Unplug the power cord when cleaning, handling the interior lamp of the fridge.

Failure to do so may result in a electric shock or other injury.

Remove water or dust from the power plug with a dry clean cloth, do not use wet hands touch it and insert it with the ends of the pins securely connected.

Do not use the fridge for non-domestic purposes(storing medicine or testing material, blood, using on a ship, etc.) It may cause an unexpected risk such as fire, electric shock, deterioration of stored material or chemical reaction.

Do not use or store inflammable materials ether, benzene, alcohol, medicine, liquid propane gas, spray or cosmetics near or in the fridge. It may cause explosion or cause a fire.

Do not put any glassware that is not design for use in a fridge or freezer inside. The glass may crack or break which can lead to injury.

Do not place the heavy object or the dangerous objects such as: cup, flower vase, cosmetics, medicine or any containers with water in the fridge.

It may be dropped and cause injury, fire or electric shock when opening or closing the door.

Safety and Warning Information

Safety and warning information

Do not touch food or containers in the freezer with wet hands. It may cause frostbite.

Do not spray water at the outside or the inside of the fridge. Do not clean it with benzene or thinner.

Do not clean the unit with any acidic cleaners, abrasive brushes, sharp tools, and/or any cleaner that contains benzene.

Do not use a drier to dry the inside of the unit, nor light a candle to remove odour. It may cause an explosion or fire.

Do not cling to the door or the trays of the door. It may make the fridge fall down and cause serious injuries or even death. Especially, do not allow the children to do the above.

Do not put ice in a thin crystal cup or ceramic ware. It may break cup or ceramic ware to cause injury.

Do not allow anyone except a qualified service person to disassemble, repair, or alter the fridge. Unless directed by the manufacturer. It may cause injury, electric shock or fire.

Do not install the fridge in a wet or high humidity environment. Failure to do so will cause premature deterioration, cause the unit to run more frequently and can cause an electrical shock.

Install the appliance in a dry, well-ventilated room.

The appliance should be placed close to the wall outlet, it is easy to cut off the power supply at the time of the accident.

Do not expose the unit to extreme heat or any open flame.

Keep your unit in a well ventilated area, make sure if the unit is built-in that there is adequate air flow around the unit.

Do not cover or obstruct the exhaust area on the back of your unit, failure to do so may cause electrically shock or injury. It may cause electric shock or injury.

Before performing any type of installation or cleaning, disconnect the refrigerator from the electrical source. When you are finished, reconnect the refrigerator to the electrical source and reset the temperature controls to the desired setting.

Product Introduction

Product features

This unit container super freeze, energy-savings, noise reduction, optimal refrigeration are preset options for your unit.

Frost-free eco-friendly refrigerator

The refrigerant R600a and the blowing agent are hydrocarbons that do not destroy the ozone layer and do not contribute to the greenhouse effect.

The freezer is automatically defrosted, saving the trouble of manual defrosting.

Energy saving and noise reduction

Integrating quick-freezing, energy-saving, noise reduction and other technologies, the refrigeration system is optimized to achieve energy saving and minimize noise.

Precise temperature control

The temperature of the refrigerator and freezer room is set, controlled and displayed separately, and the microcomputer control system makes the temperature control more accurate.

LED display and touch buttons

The LED display shows the set temperature and functional status of the refrigerator and freezer compartment respectively; The touch buttons are easy to operate and have a long life span.

Door opening alarm system

When the user opens the door for too long, the system will automatically alarm and remind the user to close the door.

Tempered glass, safe and reliable

The tempered glass shelves are safe and beautiful, have strong bearing capacity, are easy to clean, and are durable.

Detachable door seal

Special detachable door seal, long life, strong adsorption, easy to clean.

Automatic Ice Maker

The refrigerator has an automatic ice making function.

Product Introduction

Product components

The layout of items below are subject to change without notice, and may not look or come setup as seen in the picture below.

The appearance and specifications of the actual product may differ depending on the model.

A Refrigerator compartment

B Freezer compartment

- 1 Refrigerator door rack
- 2 Refrigerator glass shelves
- 3 Crisper

- 4 Freezer drawer
- 5 Ice maker (inside)

NOTE:

To get the best energy efficiency of this product, please place all shelves, drawers and baskets on their original position as the illustration above.

Product Introduction

Installation dimension

Select a good location to place your appliance where it is flat and easy to use. Avoid placing the unit near heat sources, direct sunlight or moisture.

The above figures are a guideline for installation purposes. The actual dimensions of the unit may vary slightly.

To ensure that your unit works at peak efficiency please maintain sufficient space around your unit.

Operation

Transportation

Do not carry the refrigerator horizontally or by laying it down.

Do not carry the refrigerator by holding the door or handle; the refrigerator shall be carried by lifting the bottom.

This unit should never be moved alone, two people are required to safely lift or move your unit.

Where to install your unit

The refrigerator must be placed on hard, flat ground; if cushioning is needed, stable, hard, nonflammable cushion blocks shall be used.

DO NOT USE THE FOAM PACKAGING AS CUSHIONING BLOCKS!

The unit shall be kept away from damp locations where water is present. Water or dirt should be removed from any surface of the unit as soon as possible using a soft cloth. This will help prevent rust and will help your unit run at peak efficiency.

Place the refrigerator in a well-ventilated place, reserve a certain space around and behind the refrigerator, and do not cover or block the air grille on the rear cover plate of compressor at the back of refrigerator; Keep the refrigerator away from heat source or direct sunlight.

Adjustable plastic feet

When the refrigerator stays in the packing box, plastic feet are in tightened state. After carrying it out from the packing box for placement, please make sure to adjust two front plastic feet until the height is suitable; just adjust two plastic feet with a wrench or directly by hand.

Plastic feet and rear rollers must touch the ground to prevent the refrigerator from movement, vibration or noise. When moving the refrigerator, adjust plastic feet counterclockwise to keep them off the ground, and then push the refrigerator gently to move it.

Door rack

Disassembly: Hold both sides of the door rack with both hands. Push it from the side without the guide and push it inward as seen in the diagram. Push until the edge of the door rack is separated from the groove of the liner.

Installation: Hold both sides of the door rack with both hands. Install the buckle of the guide side at first. Then push the other side inward slightly, the guide will then click into place and the door rack will be installed. Please make sure it is installed properly before use.

Operation

Before Use

This refrigerating appliance is not intended to be used as a built-in appliance.

Remove all of the packaging, including the foam backing at the bottom of the unit and the tape that fixes the shelves and door bins inside.

Place the refrigerator to a proper position, and adjust the feet to level. It is recommended to wipe out your unit with a warm soapy cloth and dry it thoroughly before use.

Place the refrigerator and adjust to level, clean it, let the refrigerator stand for above 4-6 hours, and then power the unit on. This helps make sure that the oil from the compressor has settled properly, and will help your unit run normally.

Starting

Connect the power cord, and turn on the power switch.

Upon start up for the first time, the screen will display respective set temperature values (the temperature of the fridge section is set to 39°F(4°C), the temperature of the freezer is set to 0°F(-18°C) .

The default mode is energy saving upon startup: The screen displays for 60s and then goes off. This mode to save energy and prolong the service life of LED lights.

Automatic ice maker

The ice maker and ice storage box are arranged at the upper part of freezing chamber. When using the ice maker, please make sure that the ice maker switch is turned on and the water system is connected, and the ice maker will make ice automatically; when the ice storage box is full of ice, the ice making process will stop automatically.

The ice maker can make about 1800g of ice every 24 hours.

When the freezing chamber reaches the set temperature, the ice maker can make the first batch of ice just for several hours.

Operation

Control panel

Default is Fahrenheit when power is on.
Press "F/C" button to switch between °F and °C.

NOTE: Either the °F or °C icon will illuminate to indicate in which scale (Fahrenheit or Celsius) the temperature is being displayed.

Set temperature range: Celsius degree mode.

1. Fridge temperature range: 2~8°C (Default value 4°C).
2. Freezer temperature range: -23~-15°C (Default value -18°C).

Set temperature range: Fahrenheit degree mode.

1. Fridge temperature range: 35~46°F (Default value 39°F).
2. Freezer temperature range: -10~5°F (Default value 0°F).

Operation

Setting the Temperature Control

- The first time you turn the unit on, the unit will start at the factory-set default temperature, which is 39°F(4°C) in the refrigerator compartment and 0°F(-18°C) in the freezer compartment.
- The display will illuminate when the refrigerator is first plugged in, with a sound, light show 3s display content, without any operation, after 20s screen.
- When you set a temperature, you are setting an average temperature for the entire compartment. The actual compartment temperatures may vary from the temperatures displayed depending on the amount and placement of stored food, and the surrounding room temperature.

Freezer Compartment Temperature

1. Press Freezer once to turn on the temperature control.
2. Press Freezer repeatedly to cycle through the available temperature settings, from 5°F to -10°F or from -15°C to -23°C.
NOTE: Such as °C scenario, each press advances the setting by one degree(-18→-19→-20→-21→-22→-23→-15→-16→-17→-18).
Such as °F scenario, temperature control range (0→-2→-4→-6→-8→-10→-5→-4→-2→0).
3. Release Freezer to select the desired temperature setting.

Refrigerator (Fridge) Compartment Temperature

1. Press Fridge once to turn on the temperature control.
2. Press Fridge repeatedly to cycle through the available temperature settings, from 46°F to 35°F or from 8°C to 2 °C.
NOTE: Such as °C.s cenario , each press advances the setting by one degree(4→3→2→8→7→6→5→4); Such as °F scenario , temperature control range. (39→37→35→46→44→42→41→39)
3. Release Fridge when the desired temperature setting appears.

Additional Features

Fast Freeze

The Fast Freeze feature rapidly lowers the freezer compartment temperature to freeze fresh food faster and maintain the temperature of the frozen food during periods of high usage, full grocery loads, or temporarily warm room temperatures.

The Fast Freeze feature lowers the temperature in the freezer compartment to -10°F (-23°C).

Operation

- Press Fast Freeze once to turn On/Off the Fast Freeze feature.
NOTE: When Fast Freeze is on, ❄️ is illuminated and -10°F or -23°C appears in the temperature display.
- Press Freezer button to manually turn off Freeze and return to the previously set temperature.
NOTE: Fast Freeze will automatically turn off after several hours, and the freezer will revert to its previous temperature setting.

Fast Cool

The Fast Cool feature rapidly lowers the refrigerator compartment temperature to maintain the temperature of the chilled food during periods of high usage, full grocery loads, or temporarily warm room temperatures.

The Fast Cool feature lowers the temperature in the refrigerator compartment to 35°F (2°C).

- Press Fast Cool once to turn On/Off the Fast Cool feature.
NOTES: When the refrigerator is in Fast Cool mode, ❄️ appears in the display.
- If not manually turned off, the Fast Cool feature will automatically turn off after 150 minutes.

Energy Saving

IMPORTANT: The compartment temperatures in Energy Saving mode are not suitable for the storage of certain food items.

- Press Energy Saving once to turn On/Off this feature.
NOTE: When the refrigerator is in Energy Saving mode, ⚡️ is illuminated.

Open door alarm

If a door is open for longer than 1 minute, an alarm will sound to alert you. The alarm will sound 3 times every 30s forever.

- Press Energy Saving once to turn On/Off this feature.

Demo mode (Freezer/ Fridge Temperature Indicator moving)

Demo mode is for store display, and it makes the refrigerator not to generate cool air. In case of Cooling off Mode, refrigerator may seem like working but it does not make cool air. The indicators on control panel is showing double "OF". To cancel this mode, press the "°F/°C" and "Energy Saving" at same time for 3 seconds until "Ding" sounds.

Operation

Refrigerator compartment

The fridge compartment should mainly be used to store food that will be consumed in a short time.

- 1 Door racks
- 2 Glass shelves
- 3 Crisper

Freezer compartment

The freezer compartment is used to freeze foods, store deeply frozen foods and make ice cubes. It can preserve foods for a long time.

- 4 Freezer drawer
- 5 Ice maker (inside)

CAUTION

When the ice maker is making ice cubes, you may hear the beep from water valve, flowing sound of water into ice maker, and falling sound of ice cubes. ice maker will make ice automatically; when the ice storage box is full of ice, the ice making process will stop automatically.

CAUTION

The food especially the oily food which stored in refrigerator ,please avoid the direct contact with the liner. When the interior stained with oil or oily food soup stains, should be cleaned immediately to avoid the long contact with the liner which may lead to the liner corrosion and cracking.

-Two-star(*)frozen-food compartments are suitable for storing pre-frozen food, storing or making ice-cream and making ice cubes.

One star(*), two star(**)and three star(***)compartments are not suitable for the freezing of fresh food.

-If the refrigerating appliance is left empty for long periods,switch off, defrost, clean, dry, and leave the door open to prevent mould developing within the appliance.

-Please depend on the actual situation of the product.

Operation

Instructions for storing foods

CAUTION

- When storing freezing foods, put them to the inside of freezing chamber, other than the bottle rack.
- Do not put bottled or canned foods into the freezing chamber to prevent frost cracking. Before putting hot foods into the refrigerator, cool them to room temperature first; otherwise, they will increase power consumption.
- Mark the freezing date on the packaging bag according to different storage lives of foods, so as to prevent foods from exceeding the time limit.
- Divide foods into proper pieces and package them separately, which are easy to freeze thoroughly and will not frozen together.
- The packaging materials shall be odorless, airtight, watertight and pollution-free, so packaged foods are not easy to taint by other odor, without quality reduction.
- Do not put too many fresh foods into the freezing chamber once, preferably not exceeding the freezing capacity value of refrigerator.
- Melted foods can not be frozen again, unless they are made into dishes; otherwise, their service quality will be affected.
- Glass bottles or glass containers shall not be placed into the freezing chamber or at the air outlet of refrigerating chamber duct; otherwise, they may explode.
- Foods can not block the air outlet; otherwise, abnormal air circulation will be caused.

Storage of foods

Your appliance has the accessories as the "Structure illustration" showed in general, with this part instruction you can have the right way to storage your food. The glass shelves and crisper can be removed to store food if needed.

Note: Food is not allowed to touch directly all surfaces inside the appliance. It has to be wrapped separately in aluminum sheet or in cellophane sheet or in airtight plastic boxes

Precautions for internal and external cleaning of refrigerator:

Before cleaning, always turn off the power switch, disconnect the power plug.

During cleaning, make sure that no water will enter the switch, control panel, door lamp and top control box.

Remove dirt from the outside of refrigerator with mild cleaner, then wipe with clean soft cloth, and let the refrigerator dry naturally.

When cleaning door sealing strip, always use clean water, wipe with dry cloth and let it dry naturally. Wet soft cloth with warm water or neutral cleaner to wipe the refrigerator body except the door sealing strip.

It is forbidden to flush the refrigerator directly with water, which will affect electrical insulation properties, etc.

It is forbidden to clean the refrigerator with metal wipers, wire brushes, coarse abrasive cleaners, strong alkaline detergents, or flammable or toxic cleaning fluids.

Dairy foods and eggs

Most pre-packed dairy foods have a recommended 'use by/best before/best by/ date stamped on them. Store them in the fridge compartment and use within the recommended time.

Operation

Storage of foods

Butter can become tainted by strong smelling foods so it is best stored in a sealed container. Eggs should be stored in the fridge compartment.

Red meat

Place fresh red meat on a plate and loosely cover with waxed paper, plastic wrap or foil. Store cooked and raw meat on separate plates. This will prevent any juice lost from the raw meat from contaminating the cooked product.

Poultry

Fresh whole birds should be rinsed inside and out with cold running water, dried and placed on a plate. Cover loosely with plastic wrap or foil. Poultry pieces should also be stored this way. Whole poultry should never be stuffed until just before cooking, otherwise food poisoning may result.

Fish and seafood

Whole fish and fillets should be used on the day of purchase. Until required refrigerate on a plate loosely covered with plastic wrap, waxed paper or foil. If storing overnight or longer, take particular care to select very fresh fish.

Whole fish should be rinsed in cold water to remove loose scales and dirt and then patted dry with paper towels. Place whole fish or fillets in a sealed plastic bag. Keep shellfish chilled at all times. Use within 1-2 days.

Precooked foods and leftovers

These should be stored in suitable covered containers so that the food will not dry out. Keep for only 1-2 days. Reheat leftovers only once and until steaming hot.

Vegetable container

The vegetable container is the optimum storage location for fresh fruit and vegetables. Take care not to store the following at temperatures of less than 6°C for long periods: Citrus fruit, melons, aborigines, pineapple, papaya, currence, passion fruit, cucumber, peppers, tomatoes.

Undesirable changes will occur at low temperatures such as softening of the flesh, browning and/or accelerated decaying. Do not refrigerate avocados (until they are ripe), bananas and mangoes.

FOOD	Location(Refrigerator chamber)
Butter, cheese	Upper door rack
Eggs	Door rack
Fruit, vegetables, salad	Crisper
Meat, sausage, cheese, milk	Lower area (lowest shelf 1 crisper cover)
Dairy products, canned food, cans	Upper area or door rack
Drinks, bottles, tubes	Door rack
FOOD	Location(Freezer chamber)
Small frozen food	Door rack
Packaged frozen foods	Freezer drawer
Fish,meat,ice cream	Lower area(lower shelf or drawer)

Operation

Storage of foods

Note: Food is not allowed to touch directly all surfaces inside the appliance. It has to be wrapped separately in aluminum sheet or in cellophane sheet or in airtight plastic boxes.

Freezing and storing food in the freezer compartment

- To store deep-frozen food.
- To make ice cubes.
- To freeze food.

Note: Ensure that the freezer compartment door has been closed properly.

Purchasing frozen food

- Packaging must not be damaged.
- Use by the 'use by /best before/best by/' date.
- If possible, transport deep-frozen food in an insulated bag and place quickly in the freezer compartment.

Storing frozen food

Store at -18°C or colder. Avoid opening the freezer compartment door unnecessarily.

Freezing fresh food

Freeze fresh and undamaged food only.

To retain the best possible nutritional value, flavour and colour, vegetables should be blanched before freezing. Aubergines, peppers, zucchini and asparagus do not require blanching.

- The following foods are suitable for freezing:

Cakes and pastries, fish and seafood, meat, game, poultry, vegetables, fruit, herbs, eggs without shells, dairy products such as cheese and butter, ready meals and leftovers such as soups, stews, cooked meat and fish, potato dishes, souffles and desserts.

- The following foods are not suitable for freezing:

Types of vegetables, which are usually consumed raw, such as lettuce or radishes, eggs in shells, grapes, whole apples, pears and peaches, hard-boiled eggs, yogurt, soured milk, sour cream, and mayonnaise.

Recommended storage times of frozen food in the freezer compartment

These times vary depending on the type of food. The food that you freeze can be preserved from 1 to 12 months (minimum at -18°C).

FOOD	Storage time
Bacon, casseroles, milk	1 month
Bread, ice cream, sausages, pies, prepared shellfish, oily fish	2 months
Non-oily fish, shellfish, pizza, scones and muffins	3 months
Ham, cakes, biscuits, beef and lamb chops, poultry pieces	4 months
Butter, vegetables (blanched), eggs whole and yolks, cooked crayfish, minced meat (raw), pork (raw)	6 months
Fruit (dry or in syrup), egg whites, beef (raw), whole chicken, lamb (raw), fruit cakes	12 months

Maintenance

Defrosting

This production has automatic defrosting function, without manual operation.

Cleaning

Precautions for internal and external cleaning of refrigerator:

- Before cleaning, always turn off the power switch, disconnect the power plug.
- During cleaning, make sure that no water will enter the switch, control panel, door lamp and top control box.
- Remove dirt from the outside of refrigerator with mild cleaner, then wipe with clean soft cloth, and let the refrigerator dry naturally.
- When cleaning door sealing strip, always use clean water, wipe with dry cloth and let it dry naturally. Wet soft cloth with warm water or neutral cleaner to wipe the refrigerator body except the door sealing strip.
- It is forbidden to flush the refrigerator directly with water, which will affect electrical insulation properties, etc.
- It is forbidden to clean the refrigerator with metal wipers, wire brushes, coarse abrasive cleaners, strong alkaline detergents, or flammable or toxic cleaning fluids.

After cleaning, connect the power plug of refrigerator, and connected with the refrigerator.

General information

On vacation

- When you want to leave for vacation, you had better to make the refrigerator operate continuously and leave foods that can be stored for a short time. If you want to stop the refrigerator, remove all foods, disconnect the power plug, clean the inside of refrigerator fully, and open the door to avoid producing abnormal odors.

At power failure

- Generally, short-term power failure will not affect the temperature of the refrigerator sharply. However, if power failure lasts for a long time, you shall reduce the opening frequency of refrigerator, and shall not put fresh foods into the refrigerator (prevent rise in the temperature of refrigerator from speeding up).
- If you know power failure is coming, you can turn on the "Super Freezer" function in advance to keep the temperature of refrigerator to the lowest value.

Shutdown

- Generally, it is not suggested to stop refrigerator or turn off the power switch; otherwise, the life of refrigerator may be affected.

Energy saving tips

- Make sure to keep the refrigerator away from heat source and direct sunlight.
- Before storing hot foods, cool them to room temperature and then put into refrigerator.
- Close the door timely, reduce the opening frequency, and shorten the opening time.
- When unfreezing frozen foods, you can put them into the refrigerating chamber, which will assist in refrigeration of the refrigerating chamber.
- Make sure that the temperature sensor is not covered or blocked by foods, and keep proper distance with foods.

Maintenance

Normal phenomena

Button failure

Please check the control board whether the fridge under lock mode. When under lock mode, all buttons can't work.

Low voltage, the compressor can't start

You should purchase pressurizer of more than 1000W when the area of the appliance installation, that's better to protect your fridge.

Long time to start

When the ambient temperature too high, it will take long time to start the appliance.

Middle beams feel hot

Middle beams feel hot after a period of time of the appliance run, it belongs to the normal phenomenon.

Dew drops

When external air flows into the cool inner surface of the fridge, dew drops can be formed. If the humidity of the installed location is high or during the rainy season, dew drops can form on the outer side of the fridge. This is a natural phenomenon that occurs during the humid weather, Wipe the water drops with a dry cloth.

Noise

When you operate the fridge for the first time, the fridge will operate at high speed to cool fast and the sound can seem louder. When the internal temperature falls below a certain level, the noise will subside.

When the operation of the compressor is starting or ending; various parts expanding/contracting or various control devices operating or temperature change within the fridge, you will hear the sounds, these are normal sounds.

Compressor hot

When working, the temperature of the compressor outer is more than 80℃, please do not touch the compressor, it may cause serious injury.

Compressor long time running

When the ambient temperature too high or put too much fresh foods into the fridge, it will take long time to cool down until the appliance run at the setting temperature.

Maintenance

Troubleshooting

Before calling for service, review this list. It may save you both time and expense. This list includes common occurrences that are not the result of defective workmanship or materials in this appliance.

Fault	Possible cause	Remedial action
No display on the display panel	The mains plug of the appliance is not in the socket properly.	Check whether the power is on;
Alarm sound	Door is slightly open or not close more than 1 minute.	Close the door completely.
The compressor do not work	It's under defrosting mode. Power is not connected well.	It's normal for defrosting; Check whether the power is connected well.
Compressor runs too long	The fridge has recently been disconnected for a period of time; Put too much fresh or hot food; Doors are opened too frequently or too long.	It takes some hours for the fridge to cool down completely; Hot food will cause the fridge to run longer until the desired temperature is reached; Warm air entering the fridge cause it to run longer. Open the door less often.
Vibrating noise	Floor is uneven or weak; Items placed on the top of the fridge are vibrating; Fridge is touching wall or cabinets.	Be sure floor is level and solid and can adequately support fridge; Remove items; Move fridge so that does not touch the wall or cabinets;

- Tropical(T): 'this refrigerating appliance is intended to be used at ambient temperatures ranging from 16 °C to 43 °C';

Important disassembly instructions

Guidelines for water pipe connection

1. In the lower right or left corner of the back of the refrigerator as shown in the picture, remove the rubber cap on the inlet water interface.

2. Take the water valve connector from the accessory bag. Remove the blue clip from the connector, place the connector to the water inlet and turn clockwise to make it tight.

3. Insert your water pipe (not provided) into the water valve connector and push it to the end.

4. Put the blue clip back to the valve connector to lock the connection.

TWO Year Limited Warranty

Thank you for choosing a Verona appliance for your home.

EuroChef warrants to the original purchaser ("Purchaser") of this product (the "Product"), for a period of two (2) years (except for certain components identified below) from the date of original purchase, that the Product is free from defects in workmanship and materials. This warranty covers all parts and labor required to repair or replace any part of the Product that proves to be defective under normal residential use. To be eligible for this warranty, the Product must be: (i) sold to Purchaser as new product to the original owner by an authorized distributor, retailer, dealer, or service center of Verona Appliances and (ii) installed in the United States. The warranties provided in this statement are not transferable and are valid from the date of purchase.

This limited warranty is valid only provided that written notification of a defect, as well as a copy of the original receipt for the defective Product, is received by EuroChef from Purchaser within thirty (30) days of identification of the defect. EuroChef (who may appoint 3rd party agents to act on its behalf in connection with any Product inspection or provision of warranty services hereunder) reserves the right to inspect the Product and its installation. The purchaser is responsible for providing EuroChef authorized service providers and/or representatives with access to the premises at which the Product is installed, and such other information and materials as EuroChef may request, shall be a condition to any claim hereunder. If EuroChef determines that a defect in the Product is covered by this limited warranty, it will, at its expense and as its sole and exclusive obligation for breach of this limited warranty, and Purchaser's sole and exclusive remedy, repair or replace the defective Product. If EuroChef determines that an alleged defect in the Product is not covered by this limited warranty, it shall not have any obligation to repair or replace the Product.

EuroChef will initially attempt to repair any defect in its Products. Only if a Product cannot be repaired after 3 attempts for the same issue by a EuroChef authorized service provider may the Product be replaced with a new Product from EuroChef. In the event EuroChef determines that a defective Product must be replaced, the original retailer on the bill of sale will be contacted to process a replacement order. In the event that EuroChef determines a Product is irreparable, replacement approval may take up to 30 days.

For instances where a Product is installed in a remote area outside of EuroChef's authorized network of service providers, Purchaser is responsible for the travel expenses and associated out-of-pocket costs of EuroChef's authorized service provider. In the event that a product installed in a remote location is deemed to need replacement, the Purchaser is responsible for all delivery costs and risk of loss associated with transportation of the Product to the Purchaser's location.

The Purchaser is responsible for establishing that the appliance has been installed in accordance with all directions and installation instructions included with the Product's accompanying materials at time of purchase. EuroChef shall have no obligation to render any services to correct issues caused by an Installer's failure to follow all directions and instructions. Any expense of repair deemed to be caused by faulty installation shall be payable by Purchaser at EuroChef's then current rates.

A Products' exterior paint and/or lacquer must be cared for according to the instructional materials provided with the Product at time of purchase. If those instructional materials are not followed or harsh chemicals are used, any damages and subsequent repairs to a Product's paint and/or lacquer are not covered by this warranty.

Component Warranty Periods:

Any components of eligible products showing cosmetic defects, whether in material or workmanship, are covered by this warranty for a period of thirty (30) days from the product's delivery date. Coverage* is provided for:

- Scratches
- Stains
- Surface Imperfections (ONLY stainless steel)
- Paint & Porcelain Imperfections

* Excludes slight differences in color due to materials and painting/enameling technologies.

Photo/video proof required to be submitted to service@veronaappliances.com in order to be reviewed.

Gaskets are covered by this warranty for a period of ninety (90) days from the product's installation date.

Replacement of glass components and light bulbs are covered by this warranty for a period of thirty (30) days after delivery.

Exclusions to Warranty Coverage: This Limited Warranty will not apply to any of the following:

- Any service, including repair service to correct damage caused by services performed on the Product by anyone other than an authorized EuroChef service provider, or the use of parts not authorized by EuroChef.
- Defects or damage caused by improper storage, cleaning and maintenance of the Product, including any failure to comply with Manufacturer's written instructions and documentation regarding same.
- Service calls to connect, convert, or otherwise repair the electrical wiring and/or gas line to properly use the Product.
- Replacement of components prone to wear and tear.
- Defects and damage arising from transportation of the Product to the home of the owner, by the dealer/retailer or a hired delivery/logistics provider.
- Defects and damage arising from external forces beyond the control of EuroChef such as fire, flood, earthquakes, and other acts of God
- Accidental or intentional damage.
- Use of improper pans, containers, or accessories that cause damage to the Product.

Warranty Void: This Limited Warranty will be void in any of the following circumstances:

- The Product is used on a commercial, rental, or leased basis
- The serial plate for the Product is defaced
- The Product is altered by anyone other than an authorized EuroChef service provider
- The Product is not used according to Manufacturer's written instructions and documentation regarding same.

THE REMEDIES DESCRIBED ABOVE FOR EACH WARRANTY ARE THE ONLY ONES THAT EUROCHEF WILL PROVIDE, EITHER UNDER THIS WARRANTY OR UNDER ANY WARRANTY ARISING BY OPERATION OF LAW. EUROCHEF WILL NOT BE RESPONSIBLE FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES ARISING FROM THE BREACH OF THIS WARRANTY OR ANY OTHER WARRANTY, WHETHER EXPRESS, IMPLIED OR STATUTORY

This warranty gives you specific legal rights and you may have others which vary from state to state.
